JAMESTOWN
1. Orbit above, use pencil to draw 124m line on red axis.

2. Use PENCIL to make this line into a triangle: each new side = 95.7m.

3. Use CIRCLE to draw circle from each angle, 7.6 m radius.

4. Add 9.1m SQUARES to sides of circular bulwarks

5. Use ERASER to erase lines inside bulwarks
6. Use PUSH/PULL to pull bulwarks up 1.2 m

7. Palisade logs: In the grass, use CIRCLE to make a circle with diameter approximately that of the human scale model.

8. PUSH/PULL circle up 3.5 m. Then hold OPTION key, and pull 1 m more.

9. Use ARROW to select top ring (blue), hit S (scale), hold OPTION key (centers it), and push a corner to create a cone. ESCAPE.

10. Color with paint bucket (wood), and triple click. Hit MAKE COMPONENT.

11. COPY/PASTE logs around fort perimeter.
MOVE from bottom edges, make sure says ON FACE.

12. To fill-in columns evenly along wall:
Place first column using MOVE, then press ALT (Control on PC comp) and PULL a copy of the column out to other end (along colored line=
straight)- SNAP to edge of step, then type   / # columns to fill IN BETWEEN
Ex.   **/16   (then hit return or enter)**

About /110 for a short side, /140 for the long side
